Experience

Freelance UX designer and UI developer July 2013 – till date

Working on several critical and confidential projects with clients in UK and India.

My role is to provide client with User experience and designs for their projects based on their business intelligence and analysis, User interface development for critical parts like Google API integrations and graphical interfaces.

Providing corporate training on User experience assessment, Market analysis, JavaScript, jQuery, jQuery mobile, HTML5, CSS3, LESS and Team building.

Lead User Interface developer at Sonata Software, February 2012 – June 2013

Responsibilities:

Leading offshore UI development team to meet all requirements of TUI (Thomson tours & travels, UK) online portal's UI requirements

- Reporting to UI manager onsite (UK).
- Close interaction with marketing and UX team to deliver UI changes on time.
- Making sure all UI deliverables are on time and perfect as the changes are done

to online portal having 75000 unique searches per day.

- Taking care of all online backups and version control systems.

Achievements:

Leading offshore UI development team of 4 people and took responsibility of building Center of excellence for UI

User Interface designer and developer at Oracle, October 2009 – October 2011 (On pay rolls of ASM Technology, been in Oracle on contract position)

Responsibilities:

An individual contributor working to build and maintain Oracle SSI (Solution Services India) internal web portals, which caters to its employees and clients.

- Reporting to the Client Engagement Managers. Working on their requirement for new design development which can be a new website, mailer, brochure or collateral which will be used to keep client engaged and happy.
- Building new sites and pages for various projects, building success stories of projects and made available on intranet.
- Keeping employees engaged and informed with news and updates from management, provide them entertainment and keeping the energy levels high with fun activities on employee portal which was developed by me some time ago with the support of Oracle UCM portal development kit.

Carrying additional responsibility of addressing corporate design needs of management and marketing team.

- Developing strategies and ads to attract other consultancy hubs with in Oracle.
- Creating posters, flyers and newsletters for events.
- Guiding Marketing team in technical and user experience aspects while conducting surveys and developing new tools for employees.

Achievements:

Been a member of Oracle SSI's web structure and architecture decision panel, which involves only senior management people of Oracle SSI.

Won 2 prestigious awards "Spot" & "Gem" for outstanding performance and outstanding contribution respectively in the year 2010.

User Interface Developer at Trellisys.Net, June 2008- October 2009

Responsibilities: Conversion of photoshop mocks in to HTMLs.

- HTML 4.0, CSS2, CSS3, basic javaScripting was every day of my job.
- Fixing the issues related to cross-browser, cross-platform and cross-resolutions.
- Interacting with clients from USA, Belgium, Germany, UK and India for technical specifications as I was both into design and development.

Achievements - Became a senior designer in less than a year after joining.

User Interface Designer at NXP Semiconductors (Philips), May 2007-May 2008 (1year

contract on payrolls of Thinkways Software Technologies)

Responsibilities:

- Interacting with client “NOKIA” for design requirements.
- Creating User interface for Kiosk application using Photoshop, XHTML and CSS.

Achievements:

Grown in to a User Interface designer from an ordinary graphic designer in a couple of months after joining as senior managers were impressed with my Photoshop, HTML, CSS capabilities.
